

What is the weather like?

It is raining.

Do you drive differently?

Yes, the car drives more carefully.

How come? Please describe the reason.

The car is driving more carefully due to the rainy weather. Wet roads can reduce traction between the vehicle's tires and the road surface, making it more difficult to maintain control of the vehicle. Additionally, reduced visibility due to rain can make it harder for the driver to see the road ahead, prompting them to drive more cautiously.

When can you go?

When the light turns green.
